PROFILE

Software Engineer specializing in Flutter and PHP development with hands-on experience delivering commercial web, mobile, and desktop applications. Built and deployed multiple production systems including business management platforms, SaaS tools, and e-commerce solutions serving real clients. Strong focus on performance, usability, and scalable backend architecture.

- PROFESSIONAL EXPERIENCE
- Software developer 2023–present

Freelance

 - Designed, built, and deployed commercial applications across web, mobile, and desktop using Flutter, PHP, and MySQL
 - Architected Ovnix, a full-stack affiliate SaaS with real-time conversion tracking, automated reporting, and role-based user management
 - Delivered a complete e-commerce solution for Sillia Vape, one of Egypt's leading vape retailers
 - Built 2 business management systems (gym, inventory) from requirements to production
 - Integrated REST APIs, designed database schemas, and maintained backend infrastructure across multiple live platforms
