PROFILE

Lead Software Developer at Venneir, building and maintaining the internal tools that run a large business in the dental field, using an AI-assisted workflow with Claude, Supabase, Vercel and GitHub. Before that, three years of freelance work shipping 10+ commercial web, mobile and desktop products, from SaaS platforms and business systems to e-commerce stores, with Flutter, React, PHP/Laravel and MySQL.

PROFESSIONAL EXPERIENCE

Lead Software Developer | Venneir (Lanquez Egypt)
2026 – Present · New Cairo, Egypt

- Lead software development for a large business in the dental field, owning its internal tooling end to end
- Build new internal tools and maintain and extend existing ones to streamline day-to-day operations
- Run an AI-assisted development workflow with Claude, shipping on Supabase (database, auth, storage, edge functions) and Vercel
- Manage source control, code review and deployments through GitHub

Freelance Software Developer
2023 – 2026 · Remote

- Designed, built and deployed 10+ commercial applications across web, mobile and desktop using Flutter, React, PHP/Laravel and MySQL
- Built OrthoKeep, a SaaS patient-record and imaging suite for orthodontists (cephalometric, facial and 3D scan analysis)
- Architected Ovnix, a full-stack affiliate SaaS with real-time conversion tracking, automated reporting and role-based access
- Delivered websites and apps for Saudi clients: Madania (payments), Nbarmej (software agency) and Tabalah Academy (sports app)
- Delivered the Cayo Brand e-commerce store, plus business systems for gym management, retail POS and inventory
- Gathered requirements with business owners, designed database schemas and integrated REST APIs across live platforms

Lead Software Developer

PROJECTS

OrthoKeep | WEB APP / SAAS
Practice record and imaging suite for orthodontists who work across multiple clinics. The doctor owns one record for every patient, treatment plan, aligner stage and payment, with a weekly schedule showing which clinic they are at each day. Includes four in-browser analysis workspaces: a cephalometric tracer (40 landmarks, 18 analyses such as Steiner, Downs, Tweed and Ricketts, with film calibration), facial proportion analysis, a 3D intraoral STL scan viewer with on-mesh measurement, and CBCT. Bilingual EN/AR. orthokeep.com

---

Madania | WEB APP
Arabic-first, fully RTL marketing website for a Saudi payment-solutions provider serving e-stores, platforms, apps and booking services. Features an interactive checkout simulator previewing mada, Visa, Mastercard, Apple Pay, Tabby and Tamara, solution pages per business type, a four-step onboarding journey and WhatsApp lead capture. madania.sa

---

Nbarmej | WEB APP
Conversion-focused website for a Saudi software agency offering websites, Salla/Zid stores, mobile apps and custom ERP/CRM systems. Includes service and portfolio pages, transparent pricing tiers, light/dark themes and a quote builder that packages the visitor's needs, budget and timeline into a ready-to-send WhatsApp request. nbarmej.com

---

Tabalah Academy | MOBILE APP
Bilingual (AR/EN) Flutter app for a Saudi sports academy. Members browse sports and packages (football, padel, swimming), subscribe or join free trials, track subscription progress and attendance rate, see today's sessions and coaches, and check in with a personal QR code scanned by coaches. Light and dark themes. Coming soon.

Ovnix.io | WEB APP / SAAS
Affiliate marketing SaaS for publisher monetization. Real-time conversion postback engine, finance analytics and revenue charts, automated newsletter mailer, granular roles (admin, manager, publisher) and secure REST endpoints for merchant integrations. PHP/MySQL backend with cron automation and a Flutter companion admin app. ovnix.io

---

Dawa Today | MOBILE APP
Egyptian drug reference for patients and healthcare users: instant search by brand or active ingredient, an alternative finder matching identical ingredients and concentrations, tracked official prices, digital leaflets, offline database sync and an AI/OCR prescription scanner. Flutter, BLoC, SQFLite.

Tri-Fit | MOBILE APP
Gym and sports club management: member subscriptions with expiry alerts, QR check-in, trainer booking and shift scheduling, point of sale for supplements, multi-branch cloud sync and exportable daily, monthly and annual financial reports. Flutter with a PHP/MySQL backend. Live on Play Store

---

Volty | MOBILE APP
AI-powered smart-home energy platform for Egyptian homes: real-time electricity consumption monitoring, remote appliance control, usage analytics and personalised cost-saving recommendations. Live on Play Store

---

Cashiery | MOBILE & WINDOWS APP
Offline-first point of sale and inventory system for small retailers: barcode checkout, stock alerts and supplier reorders, customer debt tracking, Bluetooth thermal receipt printing, staff shifts and profit and loss reporting, with cloud sync.

CopyCat+ | WINDOWS APP
Flutter desktop clipboard manager running in the system tray: captures copied text with its source app, instant full-text search, duplicate detection, global hotkeys and usage stats.

Cayo Brand | WEB APP
Online store for an Egyptian streetwear brand: size/colour variant catalog, mobile-first checkout, order tracking, coupon and bundle engine, and an admin panel for stock and sales. cayobrand.shop
